Azure Sentinel Workshop

Getting to grips with best-in-class security

Azure Sentinel is the pinnacle of current security technology to keep your organisation secure against the risk of external threats.

But how does it work and how can it work for you? The Azure Sentinel Workshop is a 6 week engagement that helps you to understand and test Sentinel within your technology estate allowing you to see its value before committing to a full roll out.

Whether you have a security operations team or not the workshop caters for both scenarios and is an ideal way to test Sentinel out risk free. By selecting a few workloads to begin with, the engagement will take you through how Sentinel can keep you protected and help you to understand the monitoring outputs that accelerate your incident remediation and reduce downtime.

Test drive the value of Sentinel

Cloud Direct will work with you to deploy and monitor select workloads in order for you to gain an understanding of the benefits of Sentinel whilst building up confidence and knowledge of the solution.

Any organisation any size

Sentinel can be adopted by organisations of any size to keep them protected. The workshop is a great opportunity to make sure Sentinel will work for your business risk free whilst keeping costs to a minimum.

Microsoft resource access

As an Azure Expert MSP Cloud Direct has a close working relationship with Microsoft providing access to resources for our customers. For this service we will look to gain access to resources that aid your project from additional Microsoft expertise to funding.

Why Cloud Direct?

Microsoft Azure Expert MSP partner (audited annually by Microsoft)

CAF and Co-Sell ready Microsoft Partner

Cloud first MSP - specialists in cloud solutions
